

Illustrations

Illustrations are welcome as long as they are relevant to the analysis of the article.

It is the **author's responsibility to obtain copyright clearance** and pay any associated fees. NJAS cannot publish illustrations without copyright clearance.

Captions must identify the artist or photographer, source, and date of the image.

- Start the caption with a figure number (e.g. Figure 1.)
- If appropriate, begin the caption with a brief description of the figure.
- Write a citation for the image using the following format:

Creator's First Name Last Name, *Title of Artwork*, Date of Creation, Other relevant information such as size or medium [if known], Location of Artwork, Access Date, URL. Image is used with the generous permission of [add name].

The preferred file types for images are TIFF or PNG, with a recommended resolution of 300 dpi.

Please submit captions **and proof of permission to reprint** in a separate file.

All figures should be referred to in the article text, e.g. "... (Figure 1) ..."

When submitting the final version of their article for formatting, the author should provide both a Word document and a PDF. The PDF should include all the images placed in their intended locations, along with the corresponding captions.
